November Market Analysis

November 2026 edition · Wednesday Nov 4

All 40 names on your lists, in your broker's order, each with a company summary (what it does and specializes in; all 40 together on the "Company summaries" pages, and at the top of every stock page), Wall Street price targets, 2026 capex, latest results and guidance, catalysts, partnerships, risks and a 3-month chart. This edition reflects your Nov 4 lists: **ANET, WDC, LRCX, CSCO and ALAB added, and Datadog (DDOG) at the top of the 15–50% Dip**; GOOGL, AEHR, AAOI, IREN and NOK removed. It also covers this week's news: Marvell's $115B Lumentum deal, Oracle's $20B raise, beats from Arista, Astera Labs, AMD and Super Micro, and the Democratic midterm sweep that hit AI stocks overnight. Prices are official Nasdaq closes through Tuesday Nov 3. Times are Pacific.

Price targets: Nasdaq consensus (mean, low–high, buy/hold/sell count) for every name, plus named firm targets from your outlets. 2026 capex: spending to date from company SEC filings, with guidance from your outlets where companies give it. Charts show 3 months of daily closes, which shows each stock's trend and how far it has pulled back; the shaded band is the last month. Decision support, not advice. News facts come from CNBC, Bloomberg, Seeking Alpha and Fox Business, plus company releases and SEC filings. Consensus EPS is from Nasdaq. Earnings dates marked "est." are not confirmed by the company.

Where to buy options: IV check

Next buy days: Wed Nov 4, Thu Nov 5, Mon Nov 9. Only names your rules allow are listed, best value first. **Cheap** = options cost less than the stock has actually been moving (IV below 20-day movement): the better time to buy. Normal = fair. Expensive = wait. The expiry shown is the allowed one nearest 30 days (7–60 DTE and ending before the next report); take profit at +25% to +100% (Rule 1).

After earnings: the other 12 names

No new options on these until their report is out (Rules 3 and 4). IV here is estimated without the earnings move, from two expiries after the report, so you know where each one stands and the first day you can buy (skipping Fridays and Rule 3 data days). Recheck live after the report: IV usually drops once earnings pass.

The next 5 sessions: when you can trade

Wed Nov 4	Clear for trading, but expect a weak open: futures fell after the Democratic midterm sweep and Asian chip stocks sold off. Circle reports; Coherent, Arm and Qualcomm report after the close, so no new options on those four.
Thu Nov 5	Clear for trading. Akamai and IonQ report after the close (no new AKAM or IONQ options). Lumentum also reports (optics read).
Fri Nov 6	October jobs report at 5:30 AM PT and a Friday, so no new trades (Rules 2 and 3). Vistra reports before the open.
Mon Nov 9	Clear for trading. Nvidia AI Day in Seoul (Nov 9–10).
Tue Nov 10	October CPI at 5:30 AM PT, so no new trades (Rule 3). CoreWeave reports after the close.

Market backdrop

Headwind. Democrats are projected to win both the House and Senate (AP), and Texas elected a governor who pledged a data-center moratorium. Texas holds about 27% of U.S. data-center capacity (Wells Fargo). Overnight, Nasdaq-100 futures fell about 0.5%, Japan's Nikkei fell 4.5% (Tokyo Electron −7%, Disco −10%), SK hynix fell 5.1% and SpaceX fell 5–6% (CNBC). This comes on top of the AI-spending scare: the Nasdaq-100 was still about 10% below its high (correction territory) even after Tuesday's rebound. The offset: AI results keep beating. Arista (+12% after hours), AMD, Super Micro and Astera Labs all guided above estimates Nov 3, and the 10-year yield eased to about 4.90%.

This week in review

Rules	**Wed Nov 4, Thu Nov 5 and Mon Nov 9 are clear.** Fri Nov 6 is out (jobs report and a Friday) and Tue Nov 10 is out (CPI). No new options held into reports: CRCL, COHR, ARM, QCOM (Nov 4), AKAM, IONQ (Nov 5), VST (Nov 6), CRWV (Nov 10), CSCO (Nov 11), AMAT, NBIS, CBRS (Nov 12), NVDA (Nov 17).
Midterms	Democrats are projected to take both chambers (AP). The Texas governor-elect pledged a data-center moratorium and an end to tax incentives. Traders read that as slower AI buildout: futures fell, the Nikkei dropped 4.5%, and SK hynix (−5.1%), SpaceX (−5–6%) and CoreWeave (−3.4%) fell overnight. Trump said he expects to “work with the Democrats” (CNBC).
Results	**ANET** +12% after hours: Q4 guide $3.9–4.0B vs $3.60B expected. **ALAB** revenue $584.9M (+154%), Q4 guide $730–750M. **DOCN** revenue +40%, 2027 growth 60%+ expected. AMD beat (EPS $2.09 vs $1.95) and Super Micro guided FY27 sales of $72–82B. Skyworks fell 16% on its guide. **DDOG** reported Wed morning: revenue +35% and a beat, but a flat Q4 guide ($1.19–1.20B vs $1.20B expected) sank it 17% (CNBC).
Deals	**MRVL** agreed Nov 2 to buy Lumentum for $115B in stock and fell 13%. BofA downgraded it to Neutral ($225 target). **ORCL** filed a $20B stock and bond raise and fell 8.8%; the stock priced at $116, and shares rebounded 5.9% Tuesday.
Analysts	Barclays upgraded **BE** to Overweight (+9%). Morgan Stanley cut **COIN** to Underweight, target $120 from $258. Melius cut its **NVDA** target to $315 from $420. Stephens upgraded **ORCL**. Bernstein cut its **QCOM** target to $155 before tonight's report.
Your lists	Updated Nov 4 in your broker's order. Top 5: **SKHY, AMZN, AVGO, SPCX, INTC**. 2026 Portfolio adds **ANET, WDC, LRCX, CSCO and ALAB** and now starts with ANET. 15–50% Dip now starts with **DDOG** (added Nov 4), then VRT. GOOGL, AEHR, AAOI, IREN and NOK are off. 40 names.
Market	Tuesday the S&P 500 rose 0.36% (ending a 3-day skid) and the Nasdaq 0.83%. Monday the Nasdaq fell over 1%. The 10-year is near 4.9% and Brent near $104. VIX futures are about 21 (CNBC).

Market themes that can move your stocks

Midterms and data-center politics

Democrats are projected to win both the House and Senate. The Texas governor-elect pledged a data-center moratorium, and Texas holds about 27% of U.S. data-center capacity (Wells Fargo). Investors fear tighter restrictions nationwide and fewer business tax breaks. AI and chip names sold off overnight (Nikkei −4.5%), while solar rose on expected policy reversals (CNBC). Watch whether this is a one-day scare or the start of a repricing of AI-power and neocloud names.

Most exposed: VST, BE, VRT, CRWV, NBIS, DOCN, CBRS, ORCL, SPCX, NVDA, SKHY

AI spending: still rising, now financed

Results keep beating: Arista, Astera Labs, AMD and Super Micro all guided above estimates Nov 3. The 2026 capex lines in this report show the scale: Amazon about $220B, Oracle about $70B (fiscal 2027), CoreWeave $35–39B, Nebius $20–25B, SpaceX $48B in 9 months. But the money is increasingly borrowed. Oracle is raising $20B more, SpaceX ~$40B of debt, and the market punishes cash burn.

Most exposed: NVDA, AVGO, ANET, ALAB, MRVL, CRDO, CSCO, HPE, CIEN, COHR, GLW, AMZN, ORCL, CRWV, NBIS

Optics consolidation

Marvell agreed to buy Lumentum for $115B in stock (Nov 2), betting on optics co-design for AI. MRVL fell 13% and BofA downgraded it on dilution and a China review. The deal is expected to close in the first half of 2028. Coherent reports tonight and Lumentum Thursday.

Most exposed: MRVL, COHR, CIEN, CRDO, GLW, ALAB, ANET, AVGO

Memory and chip equipment

SK hynix's record quarter, KLA's 2027 WFE outlook above $200B and Western Digital's 58% gross margin show the memory and storage cycle is strong. Lam's cautious December guide and the Nov 4 Asia equipment selloff are the overhangs. Applied Materials reports Nov 12.

Most exposed: SKHY, WDC, LRCX, AMAT, KLAC, TER, INTC, QCOM

Rates and the Fed

The Fed held Oct 28 with two dissents for a hike; the next FOMC is Dec 9. September PCE was 3.6%, core 3.1%. October CPI (Tue Nov 10) is the next test. The 10-year eased to about 4.90% overnight on the election result, but it remains high for high-multiple names.

Most exposed: All 40, most of all IONQ, CRWV, NBIS, CBRS, ALAB, NOW, CRDO

Crypto

Coinbase was downgraded to Underweight by Morgan Stanley (target $120) on weak October volumes after the Binance hack, then bounced 8%. Circle reports this week.

Most exposed: COIN, HOOD, CRCL

Event risk ahead

Company summaries: what each company does

Every name on your lists in your broker's order, with what the company does and what it specializes in. The same summary opens each stock page.

Top 5 · 5 names	
SKHY SK hynix #1	South Korean memory chipmaker (Icheon; founded 1983 as Hyundai Electronics) and one of the world's two largest DRAM makers. It leads in high-bandwidth memory (HBM), the stacked DRAM that sits next to Nvidia's AI GPUs, and also makes NAND flash and enterprise SSDs (through Solidigm).
AMZN Amazon #2	Seattle-based e-commerce and cloud giant. Amazon Web Services (AWS) is the world's largest cloud provider and earns most of Amazon's operating profit; the company also runs the largest US online store, a fast-growing ads business and Prime. It designs its own AI chips (Trainium, Inferentia) and is Anthropic's main cloud partner.
AVGO Broadcom #3	Broadcom (Palo Alto) designs semiconductors and infrastructure software. Its growth engine is custom AI accelerators (XPUs/ASICs) built with hyperscalers such as Google, plus the Tomahawk and Jericho Ethernet switch chips that network AI clusters; it also sells broadband, wireless and storage chips and VMware cloud software.
SPCX SpaceX #4	SpaceX (Starbase, Texas) is the world's dominant rocket launcher (Falcon 9, Starship) and runs Starlink, the largest satellite-internet network, including direct-to-cell service. It also has a fast-growing AI business ('Super Intelligence', formerly xAI) that builds large AI data centers.
INTC Intel #5	Intel (Santa Clara) designs and manufactures x86 processors for PCs (Core) and servers (Xeon), and is building Intel Foundry to make chips for outside customers on its 18A/14A processes in Arizona and Ohio. It also owns stakes in Mobileye and Altera; the US government became a major shareholder in 2025.

2026 Portfolio · 16 names	
ANET Arista Networks #1	Arista Networks (Santa Clara) sells high-speed Ethernet switches and its EOS network software to cloud titans and enterprises. It specializes in the data-center networks that connect AI GPU clusters, with Microsoft and Meta as its largest customers, and also sells campus switching, Wi-Fi and network observability.
WDC Western Digital #2	Western Digital (San Jose) makes high-capacity hard-disk drives, mostly for cloud data centers, after spinning off its flash business as Sandisk in 2025. It specializes in nearline drives (30TB+, with HAMR and ePMR recording) that store the data AI models train on and generate; hyperscalers buy most of its output.
HPE Hewlett Packard Enterprise #3	Hewlett Packard Enterprise (Houston) sells servers (including Nvidia- and AMD-based AI systems and Cray supercomputers), storage and networking, greatly expanded by its 2025 purchase of Juniper Networks, plus the GreenLake hybrid-cloud platform. It specializes in AI infrastructure for enterprises, governments and neoclouds.
TER Teradyne #4	Teradyne (North Reading, Massachusetts) makes automated test equipment that checks chips before they ship, including AI accelerators, HBM memory and networking chips, plus electronics system test. It also owns Universal Robots and MiR (collaborative and mobile robots).
AMAT Applied Materials #5	Applied Materials (Santa Clara) is the world's largest chip-equipment maker by revenue. It supplies deposition, etch, ion-implant, inspection and advanced-packaging tools to foundries (TSMC, Samsung, Intel) and memory makers, plus a large service business for installed tools.
LRCX Lam Research #6	Lam Research (Fremont) makes wafer-fabrication equipment, specializing in etch and deposition: the steps that carve and layer the 3D structures in NAND, DRAM/HBM and leading-edge logic chips. Memory makers are its largest customers, and services and spares are a big recurring business.
CIEN Ciena #7	Ciena (Hanover, Maryland) is a leading maker of optical networking systems and coherent optics (its WaveLogic modems) that move data over fiber between data centers, across cities and under oceans. Customers are telecom carriers, cable operators and, increasingly, cloud providers linking AI data centers.
MRVL Marvell #8	Marvell Technology (Santa Clara-based, fabless) designs data-infrastructure chips: custom AI accelerators for hyperscalers such as Amazon and Microsoft, electro-optical DSPs and interconnect chips that link AI servers, and switching, storage and automotive Ethernet chips. On Nov 2 it agreed to buy Lumentum (lasers and optics) for ~$115B in stock.
COHR Coherent #9	Coherent Corp. (Saxonburg, Pennsylvania; formerly II-VI) makes optical transceivers, lasers and engineered materials. It specializes in the 800G and 1.6T datacom transceivers that connect AI clusters, plus industrial lasers and silicon-carbide substrates for power chips.

2026 Portfolio · 16 names	
CRDO Credo Technology #10	Credo Technology (San Jose, fabless) specializes in high-speed connectivity for AI data centers: active electrical cables (AECs) that link servers and switches, SerDes chiplets and IP, and optical DSPs. A few hyperscalers make up most of its revenue.
QCOM Qualcomm #11	Qualcomm (San Diego) designs Snapdragon processors and modems for smartphones and licenses its wireless patents (QTL). It is diversifying into PCs, automotive chips, IoT and data-center AI processors, and supplies Starlink Mobile base-station hardware to SpaceX.
VICR Vicor #12	Vicor (Andover, Massachusetts) designs and builds modular power components: high-density converters and power-delivery modules that feed hundreds of amps to AI processors at the board level. It also licenses its power patents; a few large AI and computing customers drive its revenue.
ARM Arm Holdings #13	Arm Holdings (Cambridge, UK; majority-owned by SoftBank) designs CPU architectures and licenses them to chipmakers, earning royalties on nearly every smartphone and a growing share of data-center and PC chips (Nvidia Grace, AWS Graviton, Google Axion). It has started making its own chips.
NVDA Nvidia #14	Nvidia (Santa Clara, fabless) is the dominant supplier of AI accelerators: data-center GPUs (Blackwell, Rubin), the CUDA software platform, and NVLink, InfiniBand and Spectrum-X networking sold as full rack-scale systems. Data center is the vast majority of revenue; gaming, visualization and automotive are smaller.
CSCO Cisco Systems #15	Cisco Systems (San Jose) is the largest networking-equipment maker: routers, switches (including its Silicon One chips for AI data centers), Wi-Fi, plus a large security and observability software business (Splunk, bought 2024). Customers span enterprises, telecoms, governments and hyperscalers.
ALAB Astera Labs #16	Astera Labs (San Jose, fabless; IPO 2024) makes the connectivity chips inside AI racks: Aries PCIe/CXL retimers, Scorpio fabric switches, Leo memory controllers and Taurus smart cables that move data between GPUs, CPUs and memory. Hyperscalers and AI-platform builders are its customers.
15–50% Dip · 19 names	
DDOG Datadog #1	Datadog (New York) sells cloud-based observability and security software that monitors infrastructure, applications, logs and user experience, plus LLM/AI observability. Pricing is usage-based, so revenue tracks cloud consumption on AWS, Azure and Google Cloud; AI-native companies are its fastest-growing customers.
VRT Vertiv #2	Vertiv (Westerville, Ohio) makes the power and cooling equipment inside data centers: UPS and power distribution, thermal management and liquid cooling for high-density AI racks, plus services. Hyperscalers, colocation providers and Nvidia rack designs drive its demand.
HOOD Robinhood #3	Robinhood Markets (Menlo Park) runs a commission-free app for trading stocks, options and crypto, plus Gold subscriptions, retirement accounts, banking, prediction markets and an international crypto business (Bitstamp). Revenue tracks trading activity and interest on customer cash.
IONQ IonQ #4	IonQ (College Park, Maryland) builds trapped-ion quantum computers and sells access through the major clouds and as on-site systems. It has been buying companies to expand into quantum networking, sensing and secure communications.
KLAC KLA #5	KLA Corp. (Milpitas) dominates process control: inspection and metrology tools that find defects and measure chips during manufacturing. Its tools are essential at leading-edge logic, memory and advanced packaging, so it gains as chips get more complex.
ORCL Oracle #6	Oracle (Austin) sells databases, enterprise applications (Fusion ERP, NetSuite, health records) and, increasingly, Oracle Cloud Infrastructure, which builds huge AI data centers for customers such as OpenAI. That buildout is funded with heavy debt and new stock.
GLW Corning #7	Corning (Corning, New York) makes specialty glass and ceramics: optical fiber and connectivity for data centers and telecom, display glass, Gorilla Glass for phones, automotive emissions products and life-science labware. AI data-center fiber is its fastest-growing business.
NBIS Nebius #8	Nebius Group (Amsterdam; built from Yandex's former international assets) is an AI 'neocloud' that rents Nvidia GPU capacity and AI software to developers and large customers such as Microsoft and Meta. It also holds stakes in Avride (autonomous driving) and other tech businesses.
BE Bloom Energy #9	Bloom Energy (San Jose) makes solid-oxide fuel cells that generate electricity on site from natural gas or hydrogen. Its fastest-growing market is power for AI data centers that can't wait for grid connections; Oracle and utilities such as AEP are customers.

15–50% Dip · 19 names	
DOCN DigitalOcean #10	DigitalOcean (New York) runs a simple cloud platform for developers, startups and small businesses (virtual servers, storage, databases and managed Kubernetes) and is adding GPU capacity and AI-inference services.
AKAM Akamai #11	Akamai Technologies (Cambridge, Massachusetts) runs one of the world's largest content-delivery networks and sells cloud security (web-app firewall, DDoS protection, zero-trust access) and a growing distributed cloud-computing and AI-inference platform.
FTNT Fortinet #12	Fortinet (Sunnyvale) is a leading network-security company: FortiGate firewalls built on its own security chips, secure networking (SD-WAN, SASE) and security-operations software, sold to enterprises, carriers and governments.
NOW ServiceNow #13	ServiceNow (Santa Clara) sells the Now Platform, cloud software that automates IT, HR, customer-service and other enterprise workflows. It is pushing AI agents and its Now Assist products across large enterprises and governments.
CRWV CoreWeave #14	CoreWeave (Livingston, New Jersey) is the largest AI 'neocloud', renting Nvidia GPU clusters to AI labs and hyperscalers such as Microsoft, OpenAI and Meta. It builds data centers with heavy debt financing, so its stock trades closely with its credit.
VST Vistra #15	Vistra (Irving, Texas) is one of the largest US power producers, with nuclear (including Comanche Peak), natural-gas and coal plants and a large retail-electricity business. It is signing long-term power deals with data centers.
COIN Coinbase #16	Coinbase is the largest US crypto exchange: retail and institutional trading, custody (for most US bitcoin ETFs), USDC stablecoin revenue shared with Circle, staking, its Base blockchain, derivatives and prediction markets.
CRCL Circle #17	Circle Internet Group (New York; IPO 2025) issues USDC, the second-largest dollar stablecoin, and earns most of its revenue from interest on USDC reserves, so falling rates hurt it. It also runs payment and cross-border settlement networks.
BABA Alibaba #18	Alibaba Group (Hangzhou) runs China's largest e-commerce platforms (Taobao, Tmall), Alibaba Cloud (China's largest cloud provider), the Qwen AI models, international commerce (AliExpress, Lazada) and logistics (Cainiao).
CBRS Cerebras #19	Cerebras Systems (Sunnyvale) builds wafer-scale AI processors (the WSE-3, a single chip the size of a silicon wafer) and sells AI computing both as systems and as a cloud inference service; OpenAI is a major customer.

Wall Street price targets

Consensus = Nasdaq analyst consensus (average, low–high, buy/hold/sell count). Named targets are the most recent ones reported by your outlets (CNBC, Seeking Alpha; "via TipRanks" = headline on CNBC's quote page). **Bold** = JPMorgan, BofA, Morgan Stanley, Goldman Sachs, Oppenheimer, Mizuho. Dates and sources are on each stock page. Many targets were set before October's selloff, so the upside looks large; watch for cuts after earnings.

Options IV check: are the options you're allowed to buy cheap?

For each name, I took the expiry your rules allow (7–60 DTE from Wed Nov 4, ending before the next report) closest to 30 days. Its at-the-money implied volatility (IV) is compared with how much the stock has actually moved over the last 20 trading days (HV).

Cheap: IV below actual movement (ratio under 1.0); the better time to buy. **Normal**: ratio 1.0–1.5. **Expensive**: ratio 1.5 or more; you pay up and need a bigger move. **after earn.** = every allowed expiry runs into earnings, so no new options yet (Rule 3); the verdict and IV marked * are estimated without the earnings move, from two expiries after the report (term structure), so you know where each name stands once it has reported.

Source: Nasdaq delayed option quotes at Tuesday Nov 3's close (mid of bid/ask), IV solved with Black-Scholes; HV from official closes. This compares IV with actual movement, not a true IV rank, because I don't have a verified year of IV history. Earnings move = straddle price on the first expiry after the report. Quotes change daily; check live before trading.

LATEST RESULTS	Q3 (Oct 28 Seoul, Tue evening US): record revenue ₩104.6T (+328% y/y, the first quarter above ₩100T); operating profit ₩83.3T (+632%, 80% margin), above the ~₩77T consensus; net profit ₩39.8T. Shares rose ~11% in Seoul and 13%+ in New York on Wed Oct 28 (CNBC), then gave back gains in Friday's chip selloff.
GUIDANCE	No formal guidance. HBM4 shipments began in earnest in Q3 and should pass HBM3E in shipments and revenue in Q4. Long-term deals with 14 customers cover over half of 2027–28 capacity; it sees demand above supply through 2030.
2026 CAPEX	2026: guided to the high-40 trillion won range, raised in July (CNBC; Bloomberg: at least ₩45T, about $31B). Q3 capex about $9.3B, up 265% (Seeking Alpha). ₩54T committed to two new fabs, Yongin Y2 and Cheongju M17 (Aug 7). M15X is at full capacity by year-end, and investment rises 'significantly' in 2027.
CURRENT PARTNERSHIPS	• ~₩100T of 2026 shareholder returns: ₩30T+ dividends, ₩60T+ buybacks • Q3 dividend ₩20,000/share (half special, from Kioxia gains) + ₩20T buyback • DRAM supply talks with Alibaba and Tencent (report, Oct 27) • Solidigm: $45B U.S. plant talks (report)
CATALYSTS	• Fell 5.1% in Seoul Nov 4 as Asian chip stocks sold off after the US midterms (Nikkei −4.5%) • Nvidia AI Day Seoul Nov 9–10; Nvidia earnings Nov 17 • Reported Oct 27 (record ₩83.3T operating profit); next date not set
MARKET EVENTS	Memory pricing, Korean won and the Kospi; China capacity (CXMT) and US approvals for its China fabs.

LATEST RESULTS	Q3 (Oct 29): sales $201.9B, up 12%, just under the $202.3B consensus; EPS $1.89 vs $1.96 expected. Record 13.9% operating margin ($28.1B). AWS revenue $46.0B, up 39% (faster than Q2's 37%); AWS operating income $17.8B, up 55%.
GUIDANCE	2026 capex held at about $220B. Jassy says AWS can grow above 40% in both 2027 and 2028. Morgan Stanley's Nowak called it mostly an expectations miss (CNBC).
2026 CAPEX	2026: about $220B guided (held Oct 29). It spent $175.7B Jan–Sep vs $92.3B a year ago (SEC 10-Q); Q3 alone was $77.3B vs $58.7B expected. 2025 total: $131.8B. Trailing free cash flow of −$42.4B drove the selloff.
CURRENT PARTNERSHIPS	• Anthropic (AWS) • 3M expanded data-center products relationship (Oct 19)
CATALYSTS	• Reported Oct 29; next report late January (date not set) • Analysts say buy the dip after the miss (CNBC, Oct 30) • AWS re:Invent Nov 30–Dec 4 • Holiday season
MARKET EVENTS	The week's AI-spending scare: Alphabet's record one-day drop and Amazon's cash burn pushed investors toward companies that show returns on AI spending. Its capex is revenue for NVDA, AVGO, MRVL, CRDO, VRT and the optics names.
RISKS	Capex outrunning cash flow; retail growth only 12%; AI agents shopping on rival platforms.

LATEST RESULTS	Fiscal Q3 (reported Sep 2): revenue $29.6B, up 86%; adjusted EPS $3.32 vs $3.24 expected; AI chip revenue $16.7B, up 221%.
GUIDANCE	Fiscal Q4 revenue $34.8B (+93%), slightly under the $35.03B consensus; AI chip revenue $21.7B. Fiscal 2026 AI revenue raised to $58B (from $56B). Outlines $115B of AI chip revenue in fiscal 2027 and $230B in 2028.
2026 CAPEX	Fiscal 2026 (Nov year-end): $1.01B in the first 9 months vs $386M; fiscal 2025 total $623M (SEC). That's small for its size. The real exposure is customers' AI budgets and the $50B+ OpenAI chip-financing talks.
CURRENT PARTNERSHIPS	• OpenAI and Anthropic custom chips (concentration flagged by analysts) • Google TPU designs • NTT DOCOMO 10-year VMware cloud deal (Oct 20)
CATALYSTS	• Earnings Thu Dec 10 • Hyperscaler capex held or trimmed (Amazon $220B, Alphabet $195–205B, Microsoft $170B), but Alphabet's and Amazon's cash burn sparked an AI-spending selloff Oct 29–30 • Progress on the OpenAI financing deal • Nvidia earnings Nov 17 and GTC DC (Nov 30–Dec 3)
MARKET EVENTS	CEO Hock Tan says capital, not demand, is now the biggest limit on AI. Higher rates and AI-credit stress hit names tied to OpenAI and Anthropic financing. It names wafers, substrates, HBM memory and power as supply bottlenecks.

LATEST RESULTS	Q3 (Nov 4, before the open): revenue $1.20B, up 35%; non-GAAP EPS $0.81; non-GAAP operating margin 28%; free cash flow $251M; about 4,860 customers with $100K+ ARR, up 20% (company release). Beat on both revenue and EPS (CNBC).
GUIDANCE	Q4 revenue $1.19–1.20B vs a $1.20B consensus (CNBC), roughly flat with Q3; non-GAAP EPS $0.69–0.71. Full-year 2026 revenue $4.515–4.525B. Shares sank 17% on the soft outlook after running 62% higher this year (CNBC); −14.8% at 11:32 AM PT Nov 4 (Nasdaq).
2026 CAPEX	2026: $122.0M in the first 9 months ($32.1M of equipment + $89.9M of capitalized software) vs $99.4M a year ago (Q3 release). Light, because it runs on the public clouds rather than its own data centers.
CURRENT PARTNERSHIPS	• AWS, Microsoft Azure and Google Cloud (it runs on them and sells through their marketplaces) • AI-native customers (its fastest-growing usage group) • Scout 1.0, its first specialized AI model, now powers Bits Investigation (Q3)
CATALYSTS	• Reported Nov 4 (before the open); next report mid-February • Post-earnings price-target changes (before the report: Bernstein $350, BofA $335, Benchmark $330) • Cloud-growth reads: AWS grew 39% in Q3; Snowflake and MongoDB report in coming weeks
MARKET EVENTS	Software sentiment (AI-disruption fears hit ServiceNow and Fortinet in late October), cloud-consumption trends and rates. Midterm data-center worries matter less here than for hardware names.
RISKS	Usage-based revenue slows quickly when customers optimize cloud spend; reliance on fast-growing AI-native customers; valuation after a 62% run this year.

LATEST RESULTS	Q2 (Aug 7): reaffirmed its 2026 adjusted EBITDA target of $6.8–7.6B; committed up to $1B to the Helix partnership.
GUIDANCE	2026 adjusted EBITDA $6.8–7.6B. Q3 consensus EPS $2.87.
2026 CAPEX	2026: $1.57B in the first half vs $1.46B; 2025 total $2.75B (SEC). The DOE confirmed a loan of up to $4.2B to raise nuclear output (Oct 5).
CURRENT PARTNERSHIPS	• AWS: 20-year deal for 1,200 MW from the Comanche Peak nuclear plant (deliveries from Q4 2027) • Meta: 20-year deals for 2,609 MW from its PJM nuclear plants • New Era Energy: 207 MW gas deal, 20 years
CATALYSTS	• Earnings Fri Nov 6 before the open • Microsoft/Alphabet/Amazon power demand comments • FERC rejected most of PJM's data-center curtailment plan (Oct 12)
MARKET EVENTS	Power prices, gas prices, grid rules for data centers; rate-sensitive (pays a dividend). Midterms (Nov 3): Democrats are projected to win both chambers, and Texas's governor-elect pledged a data-center moratorium. Traders bet that slows the buildout.
RISKS	Regulatory changes on data-center grid access.
WALL STREET TARGETS	Consensus **$204** (+46.3% vs close) · range $169–$255 · 17 buy / 0 hold / 0 sell (Nasdaq) **Morgan Stanley** Buy reiterated (Oct 21, CNBC via TipRanks) · Raymond James $176 (Oct 21, CNBC via TipRanks)

CLOSE NOV 3	DAY	1 WEEK	1 MONTH	3 MONTHS	FROM HIGH ($330.42, Nov 3 2025)
$145.45	+5.5%	-9.7%	-22.7%	-0.7%	-56.0%

3 months of daily closes (Aug 3 to Nov 3); shaded = last month. Intraday ranges: 1 month $135.46–$192.80; 3 months $135.46–$208.33.

NEXT EARNINGS	**Not set** · last reported Thu Oct 29
OPTIONS WINDOW	Already reported Thu Oct 29; next date not set yet. A 7–60 DTE option bought now is not expected to run into a report.
IV CHECK	**Normal** · IV 69% vs 68% actual 20-day movement (ratio 1.02) on the Dec 4 expiry, 30 DTE. Actual movement includes the Oct 29 earnings move, so "cheap" may be overstated. Wide bid/ask at the last close; check live quotes.
LATEST RESULTS	Q3 (Oct 29): revenue $1.20B vs $1.233B expected (LSEG); adjusted net income $719M, up 66%, on the crypto recovery and expense discipline (CNBC).
GUIDANCE	No formal revenue guide in the coverage found. Friday: Binance's record $6.3B hack (Oct 29) pushed bitcoin under $77K; Binance paused withdrawals and says it will cover losses (Bloomberg).
2026 CAPEX	No separate capex line. 'Other investing' (incl. software and equipment) was $85.0M in the first 9 months vs $86.3M, and it bought $217.9M of crypto for investment (SEC 10-Q). It cut its 2026 expense guidance after a May restructuring.
CURRENT PARTNERSHIPS	• Citi institutional stablecoin payments (Sep 28) • CFTC approval for derivatives clearing (Sep 29) • Samsung Wallet USDC custody (Oct 8) • Marqeta stablecoin cards (Oct 16) • Open USD with Visa/Mastercard/Stripe
CATALYSTS	• Morgan Stanley downgraded to Underweight and cut its target to $120 from $258 (Nov 2) on weak October trading. Q4 transaction revenue is tracking about 11% below consensus • Rebounded 8% Nov 3 after a 15% three-day slide • Next report February
MARKET EVENTS	Bitcoin price (about $77K Friday), crypto trading volumes, rates (USDC interest income).
RISKS	Revenue miss; crypto-security scare after Binance; 60% off its high.
WALL STREET TARGETS	Consensus **$199** (+36.7% vs close) · range $100–$330 · 16 buy / 7 hold / 3 sell (Nasdaq) **Morgan Stanley** Underweight (downgraded) $120 (Nov 2, CNBC) · **BofA** $203 (Oct 5, CNBC via TipRanks) · BTIG Buy $240 (Jul 31, CNBC) · Rosenblatt $200 (Jul 31, CNBC) · Piper Sandler $146 (Jul 31, CNBC)

OPTIONS WINDOW	Reports Wed Nov 4, 0 days out. No expiry is both ≥7 DTE and before the report: no new options until it's out (Rules 3 and 4).
IV CHECK	**Normal** · IV 84% vs 74% actual 20-day movement (ratio 1.14) on the Dec 4 expiry, 30 DTE.
LATEST RESULTS	Q2 (Aug 5): EPS beat but revenue missed; USDC in circulation $73.3B (Jun 30); about 95% of revenue is reserve interest; reserve yield fell to 3.5%.
GUIDANCE	2026 'other revenue' raised to $310–330M (about $180M is a one-time gain from the Arc token presale). Q3 consensus EPS $0.40.
2026 CAPEX	2026: $35.8M (capitalized software) in the first half vs $24.9M; 2025 total $56.2M (SEC). Light. It's spending on acquisitions instead: Tazapay ($400M in stock).
CURRENT PARTNERSHIPS	• Arc blockchain launched with Wall Street firms (Sep 16) • Binance USDC promotion (Binance bought $100M of shares) • Volante (banks) • OKX investment • Expansion into 40 markets
CATALYSTS	• ⚠ Earnings Wed Nov 4 before the open • Froze $800M of USDC tied to the Binance hack (CNBC) • Fed stablecoin reserve rules
MARKET EVENTS	Interest rates (a Fed hike raises reserve income); crypto activity; stablecoin legislation.
RISKS	Falling rates; slowing USDC growth (one analysis says share is down); the CFO is leaving.
WALL STREET TARGETS	Consensus **$105** (+39.7% vs close) · range $34–$243 · 11 buy / 6 hold / 3 sell (Nasdaq) **JPMorgan** $155 (May 12, CNBC) · **Mizuho** $135 (May 12, CNBC) · **Morgan Stanley** Underweight (downgraded) $38 (Aug 3, CNBC) · TD Cowen Buy $82 (Aug 3, CNBC)
